## **FACTORIES MUST** IMPROVE THEIR ICE CREAM HERE

"Dangerous," Says Physician; "Rotten"-Health Officer.

It Is Up to City Commissioners to Pass Ordinances.

## FIND HIGH BACTERIA RATE

In One Test, 690 Million per Cubic Centimeter Found.

Condition of Plants Up to State Dairy Commission.

Danger, in the form of excessive bacteria, lurks in the ice cream supply the city health offices today following completion of bacteriological tests of ice cream sold by Topeka fac-tories. The tests were made by Miss Annetta Nicoll, city bacteriologist, un-

Annella Nicoll, city bacteriologist, un-der the direction of Dr. Leslle Rowles, head of the milk department.

That some of the cream is danger-ous to health because of the high bacteria rate was agreed upon by Dr Rowles and Dr. H. L. Clark, city health officer. In one test the rate of bacteria per cubic centimeter was 690 million.

condition was described Doctor Rowles as "rotten" and Doctor Clark as "dangerous." Milk Fat Good.

Milk Fat Good.

The per cent of milk fat in the cream, the report showed, as good. That rate is regulated by city ordinance. The bacteria rate is not. Ductor Rowles and Doctor Clark bioth admitted an ordinance governing the booteria rate is needed.

"I am not going to ask the city commissioners for such an ordinance," Doctor Rowles said. "However, I expect to put it up to them and then they can take any action they see tit. If they give us an ordinance we will enforce it with pleasure."

"The putrefactive or colon group of bacteria in the cream is dangerous."
Doctor Clark said. "The lactic acid bacilli are not dangerous.

Evidence of Carclessne

"I would say some of the high bac-teria rate in the cream is caused by some of the manufacturers being care-less with the milk they use. The bac-teria is also multiplied when the cream is not properly packed.

British and Russians Report Marked Progress.

General Haig Narrates Terrific Combats on Somme.

London, July 29 .- The British front

The state and City Inspection Begins in Topeka.

System of Investigation Will Be Conducted in Stores.

London, July 29.—The British front is withstanding Germany's most powerful attacks. Artillery hammering and massed attacks with hand to hand fighting have so far falled to dent the lines advanced by the recent British offensive.

General Haig so indicated in his report today. Usually sparing of descriptive adjectives, the British commander-in-chief embellished his brief statement of today with such terms as "hand to hand struggles continuing without intermission," "violent opposition," by the Germans and "desperate enemy attempts."

It is the belief of military experts here that the kaiser is now utilizing the great reserves concentrated in front of the British line from Verdun and other points on the western battle federal and state health officials are federal and state health officials are

Colonel Headliner on Hughes Acceptance Program.

Oyster Bay, N. Y., July 29.-Colonel Oyster Bay, N. Y., July 29.—Colonel Roosevelt has accepted the invitation of the national Republican committee to speak at the notification ceremonies of Charles E. Hughes at Carnegie hall Monday night and his address on that occasion is expected to be one of the strongest documents of the campaign. From the present indications, both Roosevelt and Hughes will direct their heavy fire at the Mexican polley of the administration. Both are charged to the muzzle with information regarding the present conditions in that section of the country, including that part the militia is playing on the border at the present time.

A Country Wide Tour.

While the colonel is still maintaining that he is out of politics and will not participate in the campaign except for several speeches in different parts of the country, there is reason to believe that when the fight begins to warm up the colonel will jump in and in all probability make a country-wide tour. Friends who have talked with the former president recently, believe he is getting restless and that when the first smoke of the battle gets in bis nostrils he will lose no time getting to the firing line.

The colonel refused to comment on the action of Progressive State hairman J. A. H. Hopkins of New Jersey in saying the colonel uttered a false-back when he was the little of the state of the colonel uttered a false-back when he was the little of the saying the colonel uttered a false-back when he was the little of the saying the colonel uttered a false-back when he was the little of the saying the colonel uttered a false-back when he was the little of the saying the colonel uttered a false-back when he was the little of the saying the colonel uttered a false-back was the saying the colonel

Than Ever Before.

New York, July 29.—While America's foremost experts completed plans for a conference here next week, the look when he said he (Hopkins) told the colonel during a conversation that the Progressives nominated the Justice early in the game. The colonel having passed the Progressive chairms the short and uglier word in dentities that he ever told Hopkins that Hughes might turn out to be "another gold brick."

## TWO YEGS CONFESS CLEAN OUT MAINS

That's the Reason for Dirty Water, Says Jesse Shaw.

E. E. Brookens Carries Jar o Evidence to City Hall.

Water obtained by consumers from the mains of the city system here is in a deplorable condition. Any one liv-ing south of the river will testify to that. Today, E. E. Brookens, 1282

ing south of the river will testify to that. Today, E. E. Brookens, 1282 College avenue, brought a fruit lar filled with water he had drawn from the pipes over his kitchen sink to the office of Frank Newland, water and light commissioner. The water resembled a very good quality of fresh, green vinegar. Held between one's eyes and the sun it could not be penetrated by the vision.

The city water has been in that condition for a week, residents of the city say. It is admitted by the water department which says the condition is caused by the city's forcing water through the mains at the rate of more than 3 million feet a day. Sprinkling of lawns, the water department assorts, is the cause of the exceptionally high pressure which is higher than in times of a bad fire.

Brookens entered the office of Frank Newland and handed the latter the fruit far.

the fruit jar.
"And we have to pay for that."

"And we have to pay for that," he said.

Jesse Shaw, superintendent of the water plant, said the water mains are being flushed every night in an attempt to clean them out. The water in the fruit jar was obtained about So'clock last night.

"The water will be clear tonight," he said. "But about midnight I am going to call for the highest pressure possibly at the plant and open every hydrant, in another effort to clean out the mains. The water will muddy in the morning until about 8 o'clock."

Frank Newland denied the substance in the water is dirt. He says it is mineral from the pipes. The water department promised to remedy the situation as soon as possible. "For some time the pressure has been low," Shaw said. "Then we put on high pressure because of the

sprinkling activities and that stirred up the sediment in the low places in the mains."

Friday night a West side minister who wanted to leave town and started to take a bath before doing so, turned the water on in his bath tub.

It was so dirty he couldn't summon enough nerve to get into it.

Several complaints have been made, during the week, to the water office.
